

DAVID GAVILLA

FULL STACK DEVELOPER

Phone

+34 640 157 129

Email

davidgavilla@gmail.com

Address

Palma de Mallorca, Spain

About Me

Full-stack developer with a Higher Vocational Training Degree in Multiplatform Application Development (DAM) and experience building web applications using React, Django/Python, MySQL, and Docker. Passionate about developing scalable and user-focused software solutions, including AI-powered platforms for healthcare and education. Experienced in backend development, database management, role-based access systems, and modern development workflows. Motivated to continue growing professionally and contribute to impactful real-world projects.

Skills

- HTML/CSS
- React
- MySQL
- AI Integration
- Docker
- Python
- JavaScript
- Django
- GitHub

Languages

- English
- Spanish
- Catalan

Experience

Full-stack developer

2025 - 2026

Hospital Universitario Son Espases

Designed and developed an AI-powered full-stack web application enabling healthcare professionals to interact with AI-powered bots trained on custom PDF documents (e.g., pediatrics and clinical resources). Implemented document ingestion and retrieval system allowing users to upload and query domain-specific knowledge bases. Built a role-based access control (RBAC) system to ensure secure and restricted access to bots and data. Developed an admin panel for managing users, roles, and bot visibility. Integrated AI capabilities to deliver context-aware responses based on uploaded documents.

Tech stack: React, Python, MySQL, Docker

Education

2023-2025

Higher Technician in Multiplatform Application Development

CIFP Francesc de Borja Moll

- Systems Administration: Deployment and management of Linux-based servers, including shell scripting with Bash for automation and system tasks.
- Databases: Design and implementation of relational databases using SQL and PL/SQL, including data modeling and query optimization.
- Software Development: Programming in Java and Python, focusing on object-oriented programming and backend development fundamentals.
- Web Development: Creation of responsive web applications using HTML, CSS, JavaScript, and XML, with emphasis on structure, design, and interactivity.
- Development Tools & Environments: Experience using Docker for containerization, Git/GitHub for version control, and professional IDEs for software development workflows.
